EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Allan Wood on May 2, 2003.

The application has been amended as follows:

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: add a label for each component shown in the drawings with the names provided in the specification, example: for 13: engine, for 14: generator, for 15: converter, etc. See the attached copy of the amendment. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Allowable Subject Matter

Claims 5-12 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art's references of record do not disclose a second converter, which is a bi-directional switching converter, connected in series with the condenser bank, and controlling the direct current for charging the condenser bank to a fixed current. The switching converter controls the charging power to the bank of condensers with a fixed or

constant output current, to achieve high charge efficiency. In other words, the switching converter functions as a constant-current source during charging.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
